Connect with a complete small office solution

HPE SMB Solutions for Small Office Deployment

Get what you need to succeed

When you're running a small to midsize business (SMB), you've got a lot on your mind. That's why you need an IT foundation that's simple to purchase, deploy, and manage — and works as expected.

For example, an on-site server with fast, secure Wi-Fi access and better application performance can enhance employee productivity. And a server that enables remote access to on-premises resources can empower employees to be productive working from home when it's needed, even unexpectedly.

Fast, on-site Wi-Fi connectivity can also help you connect customers with better experiences by enabling app-centric on-site interactions and empowering associates with information at their fingertips.

However, you may be holding off on a purchase decision because selecting, sizing, purchasing, deploying, managing, and supporting a server, storage, and Wi-Fi network seems like a complex, time-consuming undertaking. Not to mention the task of maintaining security in a Wi-Fi enabled network with no room for errors.

HPE SMB Solutions for Small Office Deployment are complete, IT solutions that take a simple approach to providing wired and wireless connectivity, running general business applications, and storing files. They even provide options for data backup and remote employee access.

HPE GreenLake

Get more of everything

HPE SMB Solutions for Small Office Deployment are based on world-class HPE ProLiant servers and HPE Aruba Networking Instant-On wired and wireless networking, available in micro, small, medium, large, and extra-large configurations suitable for up to 150 users.

Easily extend storage with optional HPE StoreEasy storage, or add Microsoft Remote Desktop Services (RDS) licensing to support up to 20 remote users for work-from-home productivity.

And protect against data loss with optional RDX Removable Disk Backup System.

These solutions enable:

- **Collaboration:** Enhance the way people and teams work together with on-site solutions that provide superior wireless connectivity and better application performance.
- **Control:** Keep data on-site for added security and control and to help conform to industry regulations regarding managing, controlling, and storing data.
- **Simplicity:** Make a quick and safe decision to adopt a validated solution that is simple to purchase, deploy, and manage even if you don't have a dedicated IT department!

Easily evolve to hybrid cloud

HPE SMB Solutions for Small Office Deployment can be easily extended to hybrid cloud for additional disaster recovery options with cloud services from Microsoft Azure or a managed service provider.

Next Steps

Take the next steps to improving your SMB business experience.
